

The Power of Preventive DENTAL CARE for a Stronger Workforce

When employees take action for their oral health and use their benefits for preventive dental care, companies get more from their dental insurance investment.

The Oral Health Impact *by the numbers*

164 million work hours are missed each year because of dental problems.¹

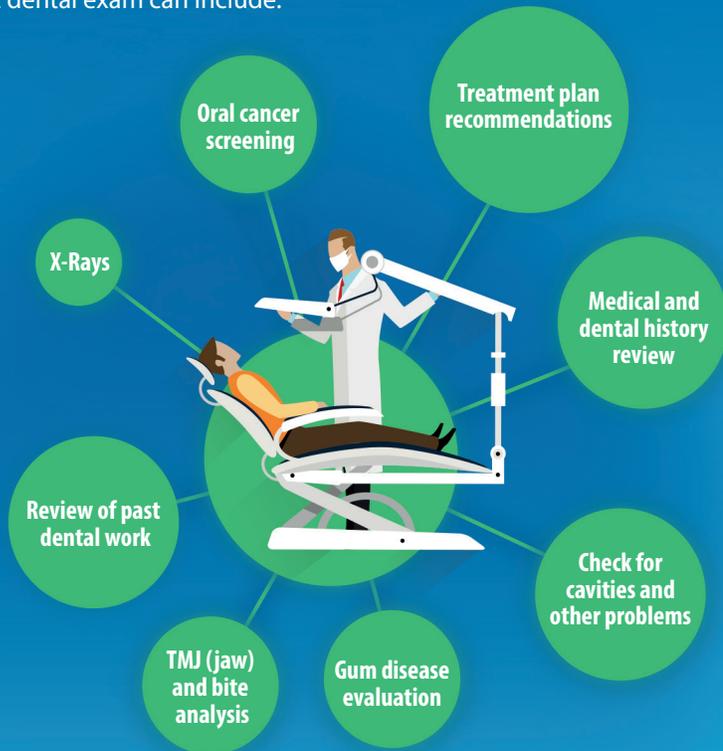

79% of dental-related emergency visits could potentially be diverted to a dental office.²

>75% of adults have some level of gum disease³

More than “just a cleaning”

Routine dental exams can help identify and address problems before they require costly treatment or time out of work. In fact, 90% of systemic diseases can be detected through the mouth.⁴ A dental exam can include:

Backed by research

United Concordia’s latest research⁵ looks at the value of going to the dentist for preventive care, which includes:

Oral evaluation

Routine cleaning

OR

Gum disease maintenance

The results:

Members who received preventive dental care **2x/year**

had lower total medical costs than those who saw the dentist less frequently (once in 3 years or not at all). This may also indicate:

Improved overall health outcomes

Better quality of life

Making it work at the workplace

In order to realize the full potential of preventive dental care, employers need a strategy:

- ✓ **OFFER** the right dental plan(s).
 - With United Concordia, all traditional plans cover preventive services at 100%.
- ✓ **EDUCATE** on the value of good oral health & how to achieve it.
- ✓ **ENGAGE** staff through live events and direct communications.
- ✓ **INCENTIVIZE** preventive dental care as part of a wellness rewards program.
- ✓ **TRACK** use to measure results over time.

The United Concordia Dental Advantage—employers get access to expert resources for incorporating dental into their existing wellness programs:

- Oral Wellness Consultants • Specialized Plans
- Educational Content • Online Tools
